

# A guarded beach in Trzebież

The guarded beach in Trzebież is located approximately 30 km north of Szczecin and approximately 14 km north of Police, on the Szczecin Lagoon. It stretches along Spacerowa Street running to the Trzebież Mała bus terminus, where the Local Government Line stops, and in the summer season, additionally the Beach Line connecting Police and Trzebież. We can get to the bathing beach in Trzebinia by the Szczecin Lagoon from Szczecin via provincial road No. 115, which in the vicinity of Tanowo connects with provincial road No. 114 leading through Police and smaller towns to Nowe Warpno through Trzebież. Signposts lead to the beach, the first of which can be seen after the railway crossing in Trzebież. Following the directions, go down Dworcowa Street, then turn left into Wojsk Ochrony Pogranicza Street and then right into Polna Street. At the crossroads, turn right along Osadników Street and then take the first left - Leśna Street, and continue straight ahead to the beach. There are two large free car parks next to the beach and many different attractions.

The guarded beach in Trzebież stretches along the short coast of the Szczecin Lagoon, in its southern, narrowed part. The beach is part of a Recreation and Beach Complex. There are: a tennis court, two beach volleyball courts with small stands and a universal playground for football and basketball. There are several playgrounds of various types at the beach, as well as a skate park, an outdoor gym, and the so-called health path with interesting exercise equipment. Along the shore from the Delfin Restaurant to the bathing beach there is a promenade in the shade of trees, among the overflowing vegetation. Parallel to it there is a promenade intended for bicycle and pedestrian traffic. There is also a road that ends at the parking lot along the promenade. One of the newest and most interesting elements is the over 10-meter-high observation tower from which you can admire the Szczecin Lagoon and the vicinity of the complex. At the beach there are: a campsite and camping site, holiday resorts and a wide range of dining facilities. The swimming area is guarded and there are regulations that must be followed. The swimming area is marked with buoys. There are floating platforms installed here, on which you can walk, but also rest on a towel or blanket. In summer, the water in the Zalewo beach is very warm, but unfortunately it is not transparent.
